

Stop leads leakages: <https://sellersresellers.com/>

- Manufacturer / seller needs to scale up. He needs resellers or referral partners or dealers
- Resellers need opportunities to make money from their networking abilities.
- But if resellers do not get feedback from sellers for their leads then lose trust & motivation.
- That in turn affects sellers in scaling up.

Stop leads leakages: <https://sellersresellers.com/>

- Register to portal
- Become authorised reseller / referral partner of a seller / manufacturer
- Seller adds requirements - all authorized resellers get notifications
- Reseller responds if he has potential lead to requirement
- Seller gives feedback

## Example

- Seller / Service Provider → Japanese classes: My Gmail ID
- Reseller / referral partner → Fair Share: My fairshare.tech ID

Note that the roles may reverse. For example, Japanese classes could be referral partner to TCS for providing resources.
